Disclaimer

Please read the following disclaimer carefully. If you are in any doubt as to the action you should take, you should consult your legal, financial, tax and other professional advisors. The information set forth below may not be exhaustive and does not imply any elements of a contractual relationship.

This document consists of information for educational purposes only and does not constitute financial or investment advice of any form. Furthermore, it does not constitute an offer to sell shares or securities, nor does it constitute a solicitation to buy such shares or securities.

None of the information found within this document is intended to influence any financial or investment decision nor should it be the basis of an investment decision of any kind. Investment advice for investment in any security, or any tax or legal advice should only be given by an investment advice firm, and Planet of The Bored Apes is not an investment advice firm.

This White Paper does not constitute an offer to sell, or the solicitation of an offer to buy, for any person for whom it may be unlawful to participate in a token sale. Those for whom it is unlawful to participate should not participate. Consult with your own lawyer or accountant to determine whether it is lawful for you to participate in this token sale. This White Paper should in no way be construed as being intended to create a contract for investment. This Space Paper may be revised, with the newest edition always appearing on our website (<https://planetoftheboredapes.xyz>). For each revision cycle, we will provide notes on what has changed the justification for the change.

We encourage readers to seek appropriate and independent professional advice to inform themselves of the legal requirements and tax consequences of any investments they make, both within Plodding Pirates \$DUB Token, NFTs, and within the blockchain industry as a whole. Investments should only be done with the help of an independent financial advisor within context of the countries of their citizenship or residence, and their place of business with respect to the acquisition, holding or trade in MoonPirate or any other tokens.

While we make every effort to ensure that any material in this Space Paper is accurate and up to date, such material in no way constitutes the provision of professional advice. Plodding Pirates does not guarantee and accepts no legal liability whatsoever arising from or connected to, the accuracy, reliability, currency, or completeness of any material contained in this White Paper. Please note that the information found within this document is subject to change.

Updated versions of the White Paper (as indicated by consecutive edition numbers) may contain information which may override, clarify or contradict previous editions, in which case the latest version should be considered the most accurate and up to date. Because of this, versions which are found outside of the official Plodding Pirates website may contain out-of-date or inaccurate information. The most up-to-date version of the white paper can be located online at <https://planetoftheboredapes.xyz>.

1 Introduction

The Planet of The Bored Apes is an NFT collection on the Solana blockchain composing of 6942 genesis Apes. Instead of being just an idle NFT collection, it is also a blockchain based game, a market alpha discord channel & community, and positions itself as creating a whole ecosystem in the metaverse, featuring further NFT airdrops to holders, a community DAO and merchandise.

This “Space Paper” explains in further detail the mechanics of the game, the minting process and the finer points of how, we the team plan to deploy these features.

2 The story so far...

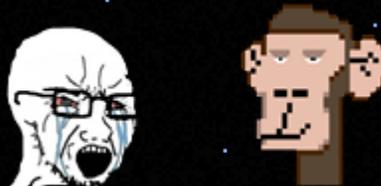

In the year 2032, scientists discovered the next step in human evolution.

The jump was not a simple step forward from homo sapien as many had expected, but involved a de-evolution from human to ape to ape deus. A complex sequence of genetic editing and cybernetic enhancement took place for those who could afford it, namely the crypto billionaires, millionaires, and degens who got lucky.

The new species "Apus Deus" or ape god were faster, stronger and more intelligent than their human counterparts. This created friction between humans and apes, as humans quickly grew to become jealous of their superior counterparts.

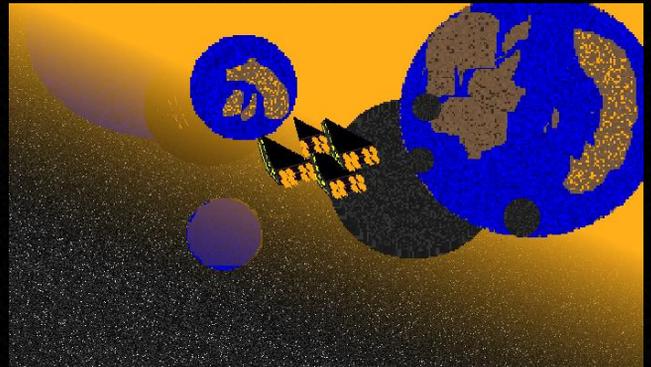

Suddenly, Earth became aware of an extinction level event, an enormous asteroid headed straight towards Earth...

Some apes committed their lives to saving humanity, while others apes saw the need to settle other planets for the safety of intelligent life in the universe. The apes that left were comprised of the earth's brightest scientists, artists, entrepreneurs, and warriors. With their fortunes combined they implored Apeus Musk to build a rocket destined for the stars.

Hundreds of years after they landed, ape society is thriving, but nobody knows what happened to Earth. Apes live in a veritable Eden on their new planet, Apeus Prime. The tentacles of ape kind (not literally) spread to neighboring solar systems and planets and interstellar travel is a common event. Their civilisation experiences an unprecedented era of scientific advancement and peaceful prosperity across the universe.

Their government is completely decentralised and democratic. Apes are very well educated on governance issues and know the importance of being independent free thinkers. The world economy and governance system all operate on an advanced cryptographic protocol called \$Apeana, which is completely impervious to inflationary measures of any kind.

But ney, Earth apparently prospered. After the asteroid hit, it drove civilisation underground into bunkers, until it was safe to emerge decades later. Apes and human kind live together harmoniously but in drastically reduced numbers. Earth has only 100 million apes and humans. Communication between Earth and Apeus Prime has grown incessantly, bringing on a new golden age of scientific advancement for both civilisations.

In the constant communication with earth, wormholes are constantly created and destroyed, creating an enormous amount of dark matter and energy. And it hasn't gone unnoticed. All of a sudden, strange beasts are beginning to land on Apeus prime.

And something big, the size of a solar system has noticed and is coming directly for the apes.

Why include a story at all?

The purpose is to set up the events that launch the Planet of The Bored Apes meta and ecosystem. The story has a comedic tone and reflects many elements of the current blockchain ethos, namely the belief in decentralised and autonomous governance and in cryptographic currencies. The project is inspired by this ethos, hence DAO mechanics and the game being on the blockchain.

What is the relationship to the Bored Ape Yacht Club?

The project is inspired by the artwork of the Bored Ape Yacht Club, but that is where the similarities end. The Planet of The Bored Apes is an entirely separate ecosystem to the BAYC and does not intend to replicate it in any way.

3 Roles

Role Name	Requirements	Privileges
Original Apesters	Be among the first 200 members in our discord server.	Get access to 1 free-mint each as a reward for being an early user, as well as access to the whitelist pre-mint.
Whitelist level 3	Invite 50 users to the discord server, or through giveaways.	Same privileges as whitelist level 2, but also get an exclusive companion airdrop.
Whitelist level 2	Invite 30 users to the discord server, or through giveaways.	Same privileges as whitelist level 1 but entitled to mint at half normal price (0.3471 Solana).
Whitelist level 1	Invite 15 users to the discord server, or through giveaways.	Access to the whitelist.
General Public	None.	None.

4 Minting distribution

There will be a total of 6942 (69 + the answer to the universe, life and everything) non fungible tokens available. After Original Apesters claim their tokens, 66% are reserved for the whitelist while 33% are reserved for the general public.

When is the launch?

We will be stealth launching and letting our community members on discord know first.

Role Name	Minting Stage	NFT allocations	Minting Price
Original Apesters	OA minting phase. 2 hours before whitelist.	1 mint per Original Apester + any awarded invitational bonus mints. Estimated 3% of total mints.	Free, to reward early adopters.
Whitelisted	Whitelist Stage. Takes place 2 hours before general sale.	10 mint limit per transaction. 66% of mints reserved for whitelisted members.	0.4269 Solana per token.
General Public	Public Stage.	10 mint limit per transaction. 33% of remaining mints reserved for whitelisted members.	0.6942 Solana per token.
Devs	Contract Creation.	Devs get 1 mint each (2 total).	Free, to reward developers.
DAO	Contract Creation	100 tokens reserved for giveaways, community rewards and the DAO.	Free.

5

\$Ape1ana

\$Ape1ana is the digital native currency of the Planet of The Bored Apes ecosystem. They are fungible tokens on the Solana network built of the ERC-20 protocol for tokens.

How do I earn and \$Ape1ana?

Each PTBA NFT entitles the wallet holder to claim 42 \$Ape1ana every day.

This is not the only way to earn \$Ape1ana. The game mechanics grant \$Ape1ana through FACTORIES and alien drops. It will also be available in community giveaways and prizes.

What will I be able to buy with \$Ape1ana?

- Merchandise.
- In-Game items, land, factories, towers and upgrades.
- Breeding and token generation.

Will I be able to buy \$Ape1ana?

Yes, it will be available for trading and staking in the Planet of The Bored Apes marketplace?

What is the marketplace?

This is where you'll be able to buy and sell in-game items and Ape1ana.

6

Game Mechanics

Participating in the PTBA game is entirely optional but is heavily recommended so that the user can engage in the PTBA ecosystem and experience all that it has to offer.

There are several features to breakdown:

1. Land and buying land.
2. Factories, Farms and resources
3. Defense and Hordes
4. Companions.

1. Land

Land are 8 by 8 tiles of 6 distinct land features, which are:

Impenetrable mountains:

Mountain features which Alien hordes can't pass, but which the player cannot build upon.

Fertile Farmland: This is the only tile that can host farmland, so use it wisely! Farms produce the resources that factories need to make upgrades.

Rivers: Rivers are made up of water tiles which early hordes of Aliens will not be able to cross. They also provide a 2x multiplier to the production of any farm nearby! Some water tiles also have fish, which allows an adjacent tile to be built and produce resources like Farms.

Homebase: The homebase is your base of operations. It can be upgraded to increase the population of your land, which is necessary for certain factory or farm upgrades. Once a home base has been destroyed, it now belongs to the horde.

Mines: Mines produce components, which are inputs that factories transform into \$Apelana, or other in game items.

By having more land, users will be able to produce more in game resources and more Apelana, so buying more land is desirable but it comes at a risk. For every piece of land that is brought, it increase the difficult of the alien hordes that come.

Neutral land: Can host factories or defensive towers.

Example of land:

Homebase - White

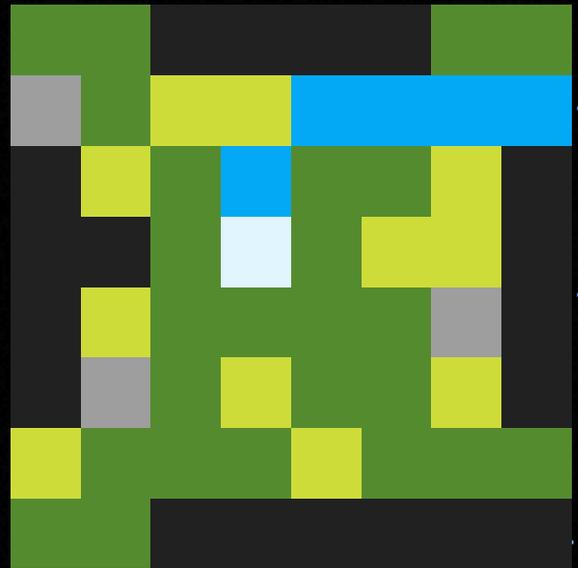

Black - Impassable Mountain

Yellow - Fertile Farmland

Green - Neutral land

Blue - River

Silver - Mine

2. Factories, Farms and resources

Factories, farms and resources are all upgradeable smart contracts hosted on the Solana blockchain.

Factories produce more \$Apelana or in-game assets, based on the input they receive (metal components and population) and the upgrade paths that they take. They can be upgraded to specialise in certain areas and to produce stronger in-game assets, better defenses or more \$Apelana. So, it's not a simple matter of producing as much \$Apelana as possible immediately because the horde will overwhelm your defenses and you will die ☹️.

Farms produce food, which is necessary to sustain and increase the number of available workers. Farms can be upgraded to produce more food.

Resources are:

Metal - For factory production.

Population - For working in farms and factories.

Food - For feeding more workers.

3. Defense and Hordes

After land has been populated by a player, they have a week before alien hordes start to attack their base. The hordes will begin to incrementally increase in intensity.

Hordes are composed of three basic types:

Weaklings

Aliens

Bosses.

The defense options available are:

Impassable mountains - nothing can pass through these... yet.

Rivers - Weaklings cannot pass through rivers.

4. Companions

Companions are basically moveable towers that are very powerful and don't need to be fed. They are upgradeable like towers and can only be earned through \$Apelana or giveaways.

There is a maximum of 2 companions per block of land.

7 DAO

In order to give back to the community and ensure community engagement, 10% of funds from the sale will go to a community-controlled DAO.

What is a DAO?

A DAO is a decentralised, autonomous organization. They are used to govern communities and resources.

What role will the DAO play?

The DAO will determine the governance issues of the community, which developers will enact.

When will the DAO start?

The DAO will start according to roadmap, after the gaming component of PTBA has been implemented.

8

Roadmap

Phase 1

Launch project on Solana blockchain.

Sell out mints.

NFT Airdrops.

Marketing.

Prizes and competitions.

Phase 2

Release game. Continue support with bug fixes and updates.

Merchandise.

Celebrity engagement.

Alien NFT drop for holders.

Phase 3

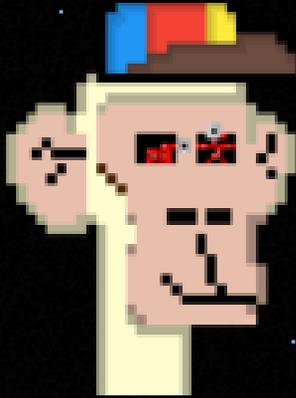

Continue making updates to the game.

Launch DAO.

Sandbox Land.

Metaverse integration.
